

Muneeswaran N

Full Stack Web Developer (MERN Stack)

+91-6382493680 | muneeswarann27@gmail.com | linkedin.com/in/muneeswaran-n-447a93339
github.com/munees-tech | muneesportfolios.netlify.app

Education

Thanthai Periyar Government Arts and Science College, Trichy

B.A. English Literature

Self-taught Full Stack Developer — completed intensive MERN stack development alongside formal education.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

Projects

E-Commerce Web Application

React, Node.js, Express.js, MongoDB, Razorpay

Live: e-commers-1-7o5j.onrender.com

- Built a full-stack e-commerce platform with product listing, shopping cart, and order management.
- Integrated Razorpay payment gateway for secure online transactions.
- Implemented JWT-based user authentication and authorization with protected routes.
- Deployed backend on Render and frontend on Netlify with full production setup.

Twitter Clone — Social Media App

React, Node.js, Express.js, MongoDB, Tailwind CSS

Live: twitter-clone-1-933p.onrender.com

- Developed a social media platform with post creation, likes, comments, and user profile features.
- Built scalable REST APIs using Node.js and Express.js connected to MongoDB.
- Implemented JWT authentication with secure login, registration, and protected routes.
- Designed fully responsive UI using React and Tailwind CSS, deployed on Netlify.

Real-Time Chat Application

React, Node.js, Express.js, MongoDB, Socket.io

Live: chat-app-67u0.onrender.com

- Built a real-time messaging app using Socket.io for bi-directional WebSocket communication.
- Implemented instant message delivery with online/offline user status indicators.
- Designed responsive chat UI with Node.js backend for persistent message storage in MongoDB.
- Deployed full-stack application on Render with live production environment.

Task Manager Application

React, TypeScript, Node.js, Express.js, MongoDB, JWT

- Built a full-stack task management app using TypeScript for end-to-end type safety.
- Implemented JWT-based authentication with full CRUD operations for task management.
- Created strongly-typed REST API controllers using Express.js with TypeScript interfaces.
- Deployed on Render (backend) and Netlify (frontend) with clean GitHub repository.

DSA & Problem Solving

LeetCode & NeetCode

- Regularly solving problems focused on Arrays, Strings, Linked Lists, and Binary Trees.
- Applying algorithmic thinking to write optimized backend API logic and data operations.
